

Add On Modules

Datapel Systems offers a full suite of additional "Best Ever" modules to round out WMS software.

Even though Datapel continues to add functionality to the core of WMS our add on modules may provide a solution that offers that little extra bit you have been looking for to help your business really take off.

Datapel Warehouse Management System as a core product is feature-rich, but the add-on modules that are available make it a truly revolutionary **WMS software solution**.

Datapel System Add on Modules include

Stock Control Flags

Assign status flags, log notes and record history to batches or individual items for effective picking and transfer. Control the quality of your product and sales.

Document Attachments

Drag and drop emails, PDFs, images, or other Microsoft Office documents onto batches or individual items. Great for material specifications, safety data sheets, and product information.

Special Pricing (Available for WMS Professional and WMS Enterprise Editions Only)

Improve customer relationships and order accuracy with price assignments specific to the customer and the item. Assign date range-based special pricing schedules per item per customer, Percentage discount or fixed price for automatic recall of subsequent orders. Unlimited number of quantity breaks.

Sales Commissions (Available for WMS Professional and WMS Enterprise Editions Only)

Sales Commission enables you to allocate and award Sales Personnel with commission on-the-fly, based on total value per sale, gross profit, or fixed amount per sale. Sales Commissions produces accurate monthly commission reports.

Remote Sales/eBay Adaptor

Remote Sales/eBay Adaptor integrates WMS with other Remote and Online Sites such as eBay. Remote Sales utilizes XML file formats to transfer periodical sales data to a "incoming" head office folder which loads valid sale XML files as OPEN orders directly into the WMS Sales Register.

DataPOS (Available for WMS Professional and WMS Enterprise Editions Only)

Incredibly smart and easy to use, DataPOS provides WMS with POS functionality at your fingertips. With a touchscreen-optimized POS solution for fast front-counter sales, a remarkably quick order and tightly integrated WMS fulfillment system makes DataPOS the complete retail solution.

IFS SmartFreight® Adaptor

Integration between Datapel Systems Warehouse Management System (WMS) with Interactive Freight Systems **SmartFreight®** offers an unparalleled multi-carrier/Warehouse Solution for businesses. Save time, money and avoid the need to re-enter information as data is transferred bi-directional between WMS and IFS SmartFreight®.

DPL Generic Carrier Adaptor

DPL Generic Carrier unifies your preferred shipping freight carrier to your Datapel WMS. Save time and avoid the need to re-enter information as data is transferred bi-directional between WMS and your carrier system. DPL Generic Carrier Adaptors are available with any of the following carrier systems; TOLL IPEC, TNT, Australian Air Express, Australia Post and Star Track Express.

Stock Count Manager

Stock Count Manager takes control and simplifies the arduous process of Stocktake and Cycle Stock Count with a Stock Count Wizard that helps create, consolidate and report items. Used in Conjunction with a WiFi handheld and Datapel Wireless Mobility Server Module Stock Count Manager becomes a powerful addition to WMS.

Datapel Wireless Mobility Server (Requires WiFi Network)

Enables stock look-ups, scan-receive, scan-pick, transfers and stocktake with the complete freedom of mobility from a handheld which occurs in conjunction with WMS in real-time. Variety of WiFi mobile handheld/portable touch terminals available upon request.
