

Multi-Carrier Adapter IFS SmartFreight

IFS SmartFreight® is the market leading Freight Management System with over 2000 companies enjoying substantial savings in transport costs.

Having 100% compliancy with all major freight carriers, IFS SmartFreight® gives your organisation complete independence from carrier based systems allowing you the freedom to choose which freight company best suits your needs and print correct documentation each and every time.

Integration with IFS SmartFreight offers an unparalleled multi-carrier solution for your business. Save time, money and avoid the need to re-enter information as data is transferred **bi-directional** between **WMS** and **IFS**.

IFS SmartFreight® can assist your logistics needs and further enhance your Datapel experience;

Please contact Datapel Systems to arrange a demonstration and/or discuss how this addon solution can aid your business.

Additional Information

Further information about IFS SmartFreight® solutions is available on their website.
