

Stocktaking Made Easy

Advance Stock Count Manager

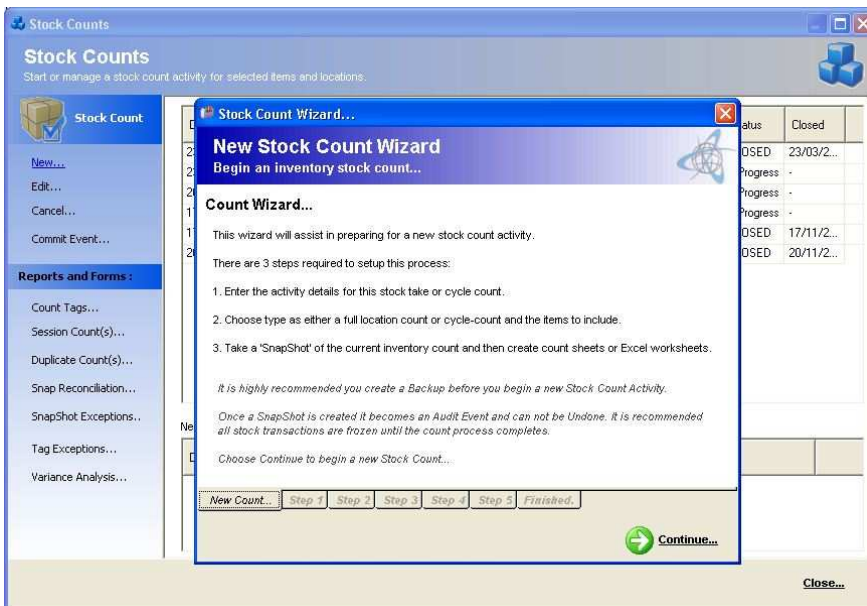

Stock taking is not only an audit requirement but also an essential process for all organisations. It is a process to ensure the company stock are physically counted and inspected at a particular point in time.

Depending on the type of business, stock taking process can be conducted annually, quarterly, monthly or even daily. For those high value items, you may even want to count on a daily basis.

The Stock Count Manager Module has been designed to PricewaterhouseCoopers Australia Audit Specifications and provides guidance throughout the Stock-Taking steps.

Stock Count Manager not only provides clear guidance, it also takes control and simplifies the arduous process of stock counts by helping create, consolidate and providing reports throughout the count process.

Stock Count Manager used in Conjunction with a Wi-Fi handheld and Datapel Wireless Mobility Server becomes a complete solution in managing your business stock takes and stock count requirements.
